

# Student Success Story

## MyMathLab®

**Danielle Schneider**

**Hometown:** Ocala, FL

**School:** College of Central Florida

**Ambition/Career Goal:** Get my master's degree in Psychology to become a Marriage and Family Therapist

**In my free time...** I read as well as work as Treasurer in the Psychology Club at my school.

## How did using MyMathLab help you succeed in your course?

At the beginning of my experience using MyMathLab, I was a bit apprehensive. Would an online program really be able to essentially teach me how to do complicated math when I am terrible at math as a subject? Once I started practicing with MyMathLab, I was pleasantly surprised—it was made to help me learn the subject and gave me every opportunity to succeed in one of my worst subjects.

I ended up getting an A in the class. I was completely surprised to actually comprehend the subject. I learned that math is easy as long as you have the tools provided by MyMathLab.

## How will your success using MyMathLab affect your future?

I no longer find math to be a complete lost cause. I have confidence when I enter a classroom where math will be utilized. I not only understand math, but I can retain the math skills for the rest of my college experience.
