

# Student Success Story

## MyMathLab<sup>®</sup>

### Morgan Paige Richardson

Hometown: Shreveport, LA

School: Bossier Parish Community College

**Ambition/Career Goal:** My ultimate goal is to become the elementary school teacher that children remember forever, to help to shape young minds, and encourage children to view school as an exciting opportunity, rather than a chore.

### How did using MyMathLab help you succeed in your course?

I have always struggled with math, since middle school. MyMathLab, with the walkthroughs, study help, and video assistance made me feel confident in doing math, which was something new for me. Every “Good job!” or “Excellent!” that popped up on the screen made me more eager and excited to move further with my learning.

MyMathLab is definitely the reason for the A I received last semester, and I am confident it will help me reach that same goal this semester. MyMathLab taught me the basic skills I need in order to understand more difficult and extensive math equations. MyMathLab has worked for me better than any tutoring service or in-class teacher has been able to. I definitely look forward to using this system more in the future.

### How will your success using MyMathLab affect your future?

Because of my high grades in math, I am confident that I will be able to get into the graduate school of my choice. I am finally able to truly understand math, thanks to MyMathLab, and I look forward to passing the knowledge I have learned on to my future students. MyMathLab has truly changed my view of math for the better, and for good.
