

Student Success Story

MyMathLab®

Taylor Giersbach

Hometown: Sierra Madre, CA

School: Citrus College

Ambition/Career Goal: Detective or FBI

In my free time... I like to garden and play soccer.

How did using MyMathLab help you succeed in your course?

I became more comfortable working online because of MyMathLab. MyMathLab acts like a tutor. It doesn't just give you the answer—it provides extra help by breaking down problems step by step and explaining each step clearly. I learned more from doing homework in this class than any other class I've taken. I definitely felt more prepared for quizzes and exams using MyMathLab.

How will your success using MyMathLab affect your future?

My success with using MyMathLab will help me understand my other courses better overall and will help me reach my future career of being a detective.
