

Student Success Story

MyMathLab[®]

Taylor Messimer

Hometown: Albuquerque, NM

School: University of New Mexico

Ambition/Career Goal: Speech Therapist

In my free time... I like to spend time with my loved ones and read fiction novels.

How did using MyMathLab help you succeed in your course?

MyMathLab shows students different ways to learn the information besides a class lecture. I especially enjoyed the “Solve a Similar Problem” feature. It explained exactly what needed to be done and did not give me the answers, thus allowing me to come with the answers on my own.

Using MyMathLab has reduced my anxiety towards math tremendously. MyMathLab gave me the confidence to continue with my class work and not give up on myself. I was also able to help others who did not understand the information. In doing this, I reinforced what I had been taught and was able to get an A in the class. I have never gotten an A on a test in math before, much less a math class!

How will your success using MyMathLab affect your future?

My outlook on math has changed completely. Before MyMathLab, I would dread going to class and I had little hope that I would pass any college math class. After using MyMathLab, math became a class that I looked forward to. I know that I can pass any math class now.
